

LEABRIDGE™

SATIN RIDGE™ FINISH

Satin Ridge Collection™

Luxury Series

C A M B R I A®

SLAB VIEW

DETAIL VIEW

Available exclusively in our Cambria Satin Ridge™ finish, this innovative design features gradations of cool white and warm honey, with borders of textured ridges—creating an overall look reminiscent of salt flats.

AVAILABLE ONLY IN CAMBRIA SATIN RIDGE™ FINISH

SLAB SIZE: 122in x 55.5in

THICKNESS: 2cm, 3cm*

Cambria's design samples are small selections cut from a slab and do not fully show all design characteristics of a slab or the final installed product. Prior to purchase, view a larger representation of a design at CambriaUSA.com. Variations in natural quartz stone color, pattern, size, shape, and shade are unique and inherent characteristics of Cambria products. Certain designs include natural free-flowing quartz crystals that may result in surface deviations to the touch and appearance. Color blotches are intended to enhance the natural beauty of many of Cambria's designs. These variations and characteristics do not affect performance and do not qualify for product replacement. Cambria products are not seamless when installed; seams are visible and design pattern and shade will change at seams. Surface markings are more visible on monotone colors than multicolored surfaces. Cambria Matte™ finish will show surface markings caused during normal use, which are easily removed with an all-purpose cleaner such as concentrated Simple Green® cleaner. **Cambria Satin Ridge™ finish reflects a rich distinctive surface with a sensual texture, adding a powerful tactile dimension; edges differ in look and feel from the top surface—mitering extends the top surface to exterior edges; and slabs are thicker than other 2cm and 3cm designs and offer the same maintenance-free Cambria benefits.** Cambria is durable and resistant to surface damage. However, all stone can be damaged by force, and no stone is chip- and scratch-proof. Objects hitting Cambria's surface, especially at edges near sinks or dishwashers, may chip the product. Sudden and/or rapid temperature change may damage the product. Direct or sustained heat transfer, for example, from pots, pans, and other cooking units such as griddles, slow cookers, and heat lamps, may damage Cambria's surface. Therefore, the use of a solid trivet is always recommended. Cambria is not a structural support material and must be supported in every application.
